The language in the electronic form is identical to the language in the paper form. The major difference is that the initial fields in the paper form have been replaced by check boxes in the electronic form.

(✓) Client Signature

Scroll to the bottom of the form after client has read all components. Client must sign the form using a finger, track pad, e-pen, or mouse. Click "Apply" and then click "Save".

Remember...

Do not add information to HMIS until ROI is valid

No client information may be added or updated in HMIS until a client signs a valid ROI and it is uploaded to the system.

Client must sign ROI and identify expiration date

You may read the ROI language to your client but staff should not sign the ROI for the client. Signature does not have to be legible but it must come from the client.

Check boxes and initials

When you review the ROI, please make sure to review the check boxes and/or initial locations.

Anonymous Clients

If a client refuses to sign an ROI, their client profile must be anonymous. Anonymity does not prevent a client from accessing the benefits of Coordinated Assessment. \otimes
