Santa Clara County VI-SPDAT Instructions

Before Completing the VI-SPDAT:

- 1. Check in HMIS to see if the individual/family has already completed a VI-SPDAT by looking under the Assessments Tab.
- 2. Upload a Signed Client Consent Form into HMIS: No information, including the VI-SPDAT, may be entered into HMIS until a signed client consent form (aka Release of Information or ROI) is uploaded into HMIS.

Completing the VI-SPDAT:

- 1. Select the appropriate version of the VI-SPDAT:
 - a. VI-SPDAT for Single Adults Use this version for adults age 25 or older with no children in the household.
 - **b.** VI-SPDAT for Families Use this version for households with at least one child under the age of 18.
 - c. **TAY VI-SPDAT** Use this version for transition age youth (age 18-24) and unaccompanied minors.
 - **d.** JD-VI-SPDAT Use this version for households coming out of jail through Custody Health and Rehabilitation Officers.
- 2. Introduce the VI-SPDAT: Explain to the client what you are doing using the introductory script on the next page.
- **3. Complete All Questions:** Complete the VI-SPDAT and follow-up questions, including the additional questions on the last page of this packet.
 - a. While self-report is still the primary way that information is captured in the VI-SPDAT, assessors can also incorporate other limited sources of information to complete the assessment. The assessor can remind clients of past responses and can use other information that the client consented to share in HMIS or other sources.
 - When using external information, be transparent and tell the respondent about the information you are planning to use in the assessment. Assessors must give the client a chance to correct this information.
 - If there is a discrepancy between the answer the client gives during the assessment and the external information, assessors must use the answer provided by the client.
 - If external information is used during the assessment process, the source of that information must be recorded in the Notes tab in HMIS.
- 4. Enter the VI-SPDAT in HMIS: You can find the VI-SPDAT under the Assessments tab within a Program enrollment in HMIS.
 - a. If the Assessment Score is 4 or Higher, or a Veteran of any score: Refer the assessment to the community queue in HMIS.

After Completing the VI-SPDAT:

1. **Collect Contact Information:** Collect as much contact information as possible (phone, email, service provider or case manager that the individual/family works with, locations that they frequent, etc.). It is critical that we have as much contact information as possible in case any referrals become available for the individual/family. Ask them to come back and update their contact information if it changes.

- 2. Share information with the individual/family: Do NOT share the numerical score from the VI-SPDAT. If the person is interested, you can provide an explanation of the type of housing program that looks like the best fit for the individual/family.
- 3. If the score falls into the "no housing intervention" category (0-3): Explain that the assessment shows that they have the skills and ability to get back into housing with limited assistance. Refer the individual/family to resources in the community that will help them address barriers, such as: public benefits, employment programs, security deposit assistance, etc.

Santa Clara County Introductory Script:

I am going to go through a short survey with you that will provide us with more information about your situation. The answers will help us determine how we can best support you. Some of the survey questions are personal in nature, but they only require a Yes/No or one word answer. I really only need that one word answer. You don't need to feel any pressure to provide more detail. You can also skip or refuse to answer any question. Skipping multiple questions may make it harder for us to identify services for you, but it is your right to refuse to answer questions you don't feel comfortable with.

Please do your best to answer all of the questions as honestly and accurately as possible. Honest, accurate answers are important to help us identify the right services for you. In addition, if we are able to refer you to any services based on the information in this survey, that program will still need to verify all eligibility information. So, if your answers aren't honest, it could prevent you from being accepted into a program.

The information that I collect with this survey will be stored in HMIS along with the rest of the intake information you provided. Sometimes we are able to identify services that might be a good match for you based on the information you provide. If that happens we will try to contact you, so it's really important that you provide current contact information. This could include phone numbers, locations you frequent, case managers or organizations that you work with, or any other information that might help us find you.

🗆 VA Medical	
--------------	--

□ Other

Assessor Companion Question: [Observe, don't ask]

To capture mental health, cognitive impairments, and substance use issues more effectively when individuals are unable to answer these questions, the VI-SPDAT process includes an observation feature in its scoring for these questions.

If a client answers Yes to certain questions related to mental health, cognitive impairments, or substance use issues, the standard scoring will apply and the added assessor companion questions at the end of the assessment are skipped. If a client answers no to the related questions, but the assessor observes behavior to indicate the answer should be yes, then assessors must answer the observation questions at the end and include a note explaining what led the assessor to believe that the client's response did not reflect the true situation.

1. Has the assessor observed any behavior to indicate a mental health or cognitive issue? (Examples: speaking gibberish, having visual or auditory hallucinations, exhibiting paranoia, severe trouble with memory or comprehension)

□ Yes □ No

- 2. If assessor observed any behavior to indicate a mental health or cognitive issue, please describe how this meets criteria.
- 3. Has the assessor observed any abscesses or track marks from injection substance use?

□ Yes □ No

4. If the assessor observed any abscesses or track marks from injection substance use, please describe how this meets criteria.
