Chief Executive Officer
Regional Task Force on Homelessness

Privacy & Security Toolkit

A pratical framework for strengthening privacy, minimizing risk, and promoting accountability. Our toolkit brings together a suite of actionable tools to help communities proactively manage privacy and security across their HMIS environment.

Toolkit Overview

This overview provides emphasizes the importance of having a comprehensive Privacy & Security Monitoring Program and introduces the tools to help you establish a proactive data stewardship approach.

Policy & Security Review Framework

Guides communities through an assessment of privacy and security policies across core domains like consent, access, and breach response. Designed to align with HUD, HIPAA, and 42 CFR Part 2 expectations, it supports both compliance and internal accountability.

Data Inventory Guide

Helps you document what data you collect, where it's stored, who can access it, and how it's managed. This foundational tool supports compliance with HUD standards and strengthens your overall data protection strategy.

Interoperability Assessment

Provides a structured framework to evaluate data sharing arrangements with external systems. It helps identify risks, ensure legal compliance, and support ethical, transparent integration.

Role-Based Strategies

Outlines how every level of your organization can contribute to a strong privacy and security culture. Reinforces shared responsibility through practical examples and role-specific actions.
