Clarity Human Services: COORDINATED ENTRY

Standard onboarding support covers HUD coordinated entry data standards in Clarity and functionality needed to produce the CE APR:

→ Coordinated entry models
→ Program setup
→ Assessments and scoring

→ Current living situation
→ Coordinated entry events
→ Prioritization via community queues

Need additional support?

Bitfocus Professional Services can help you design and build advanced workflows to meet your community's unique needs.

- Create complex custom assessments to reflect your community's priorities

- Build sophisticated scoring processors to score your assessments and prioritize your clients

- Define eligibility criteria and attach it to programs, funding sources, buildings, or individual housing units

- Use the automated eligibility engine to show you who's eligible and why

- Prioritize and refer clients to resources through the Community Queue

- Customize up to ten Community Queues to fit your community's needs

- Filter clients on your Queue by score, eligibility, or characteristics you define

- Use built in features to snooze clients, automatically exit them, or indicate document readiness

- Monitor performance through a suite of built in reports and dashboards

EDIT POINT PRIORITY

Name	Priority
Points	1.0
Store In Details	⬭

CONDITIONS

		Pregnancy Status	Equals ⌄	Yes
Or ⌄		Age	Greater Than ⌄	65
Or ⌄		VI-F-SPDAT: Family member pregnant?	Equals ⌄	Yes

Specify complex, layered criteria for points on assessments

MIDTOWN SHELTER: ELIGIBILITY   ADD REQUIREMENT ⊕   ADD PRESET ⊕

		Age	Greater Than ⌄	17	
And ⌄		Gender	Not Equals ⌄	Man (Boy, if child)	⌄
And ⌄		Veteran Status	Equals ⌄	Yes	⌄

Define eligibility criteria using data points from across Clarity

Community Queue

Housing Queue	Shelter Queue

⬤ Eligible Clients Only		Mode	Priority Scoring ⌄
